EXPERIENCE

Software Engineer

January 2026 – Present

Timmons Group · Richmond, VA (Remote)

- Own technical leadership across 4 client projects, driving active development and modernization efforts
- Orchestrated AI agents to implement tickets, raising merged PRs from ~1–5 to 7–10 weekly after review
- Expanding Playwright E2E coverage from ~35% of critical user flows on an active client project
- Leading .NET 6 to .NET 10 modernization, including broader project architecture upgrades on .NET 10
- Enhancing a company-wide feedback platform and integrating it into projects beyond Basecamp/spreadsheets

Software Engineering Intern

May 2025 – December 2025

Timmons Group · Richmond, VA (Remote)

- Designed DB tables, CRUD APIs, and React UI to assign 500+ client employees in-app vs manual spreadsheets
- Added in-app real-time area calculations, speeding demos by cutting ArcGIS Online round-trips
- Collaborated with solutions architects and senior developers on the React turnkey template for new projects
- Led stakeholder demos that secured client approval to advance features into UAT for release

Software Development Intern

June 2024 – August 2024

Carahsoft · Reston, VA

- Developed REST API database functions to view, create, and manage care packages for 5000+ vendors
- Created an xUnit project with over 30 tests to reinforce an automated care package delivery service
- Converted 100+ API client functions to asynchronous for enhanced response time and scalability
- Collaborated with teams of 4–8 to provide refactoring and debugging support, ensuring efficient code

EDUCATION

University of Virginia

Charlottesville, VA

Bachelor's in Computer Science, Minor in Data Science

August 2022 – December 2025

- **GPA:** 3.66/4.00
- **Coursework:** Data Structures & Algorithms, Software Engineering, Internet Scale Applications, Artificial Intelligence, Machine Learning, Computer Architecture, Discrete Mathematics, Linear Algebra

PROJECTS

Loggd

July 2023 – August 2023; updated June 2024

JavaScript, HTML, CSS, GPT-3.5

- Engineered a web extension to decrease navigation times to a desired movie page by 40%
- Applied GPT-3.5 as an opportunity to learn prompt engineering in the creation of the initial backend
- Performed maintenance to add 6 color schemes and additional navigation destinations
- Utilized browser APIs to ensure compatibility with over 20 commercial and open-source browsers

Charlottesville Top8s

April 2024 – June 2024

Python, JavaScript, HTML, CSS, SQLite, Django, Pillow, Fly.io

- Created a graphic generator for Super Smash Brothers tournament results with over 200 billion outcomes
- Designed 3 unique layouts, using Pillow, for the tournaments organized by both Charlottesville and UVA
- Configured an SQLite database allowing users to manage theirs of the estimated 80 annual creations

SKILLS

AI/Agentic Development:

Claude Code, Cursor, AI Agent Orchestration, Prompt Engineering

Languages:

TypeScript/JavaScript, Java, Python, C#, C++, SQL, HTML, CSS

Tools/Libraries/Frameworks:

React, MUI, .NET, Flask, Django, NestJS, REST APIs, pandas, NumPy, scikit-learn, Docker, AWS, Azure, GitHub Actions, Git, Playwright

Soft Skills:

Project Management, Problem Resolution, Continued Learning
